A PLAN FOR RESTORATION AND RECOVERY OF AQUATIC SPECIES IN ALABAMA

STRATEGIC HABITAT UNITS

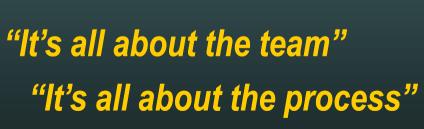

DEVELOPING A STRATEGIC PLAN FOR NATIONAL CHAMPIONSHIPS

The Team

Strategic Habitat Unit (SHU) team = Alabama Rivers and Streams Network

...to study, manage, and develop our water resources in a scientific and comprehensive way to minimize their degradation, maximize their availability for all users, and restore and recover aquatic species.

Clean water for our future – a key to a prosperous Alabama

Needs

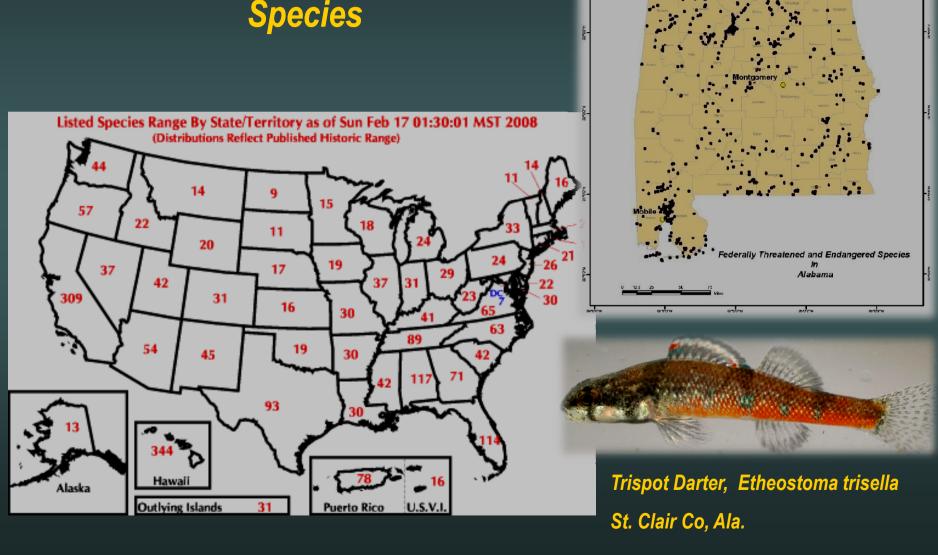

- Ensure adequate water supplies for the future
- Manage watersheds for water quantity and quality
- Restore water quality
- Restore habitat
- Recover E&T species

Tools

- Clean Water Act
- Farm Bill
- Endangered Species Act
- Watershed partnerships
- SHUs
- Interdisciplinary watershed science

Framework Partners Money

Current and Increasing Number of Aquatic Listed Species

Endangered, Threatened, Candidate, Exirpated, P1, P2

Total 201 species

- Mussels 70
- Snails 51
- Crayfishes 18
- Fishes 51
- Herptiles 11

Initial Steps

Critical Habitat Designation 2004

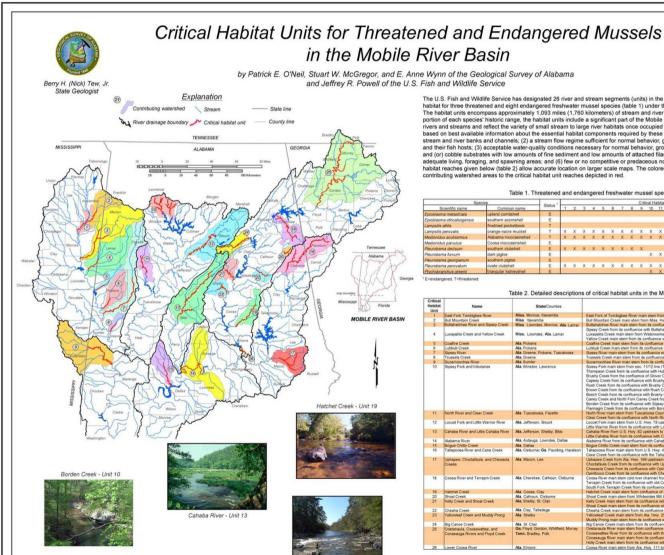

Multispecies Recovery Plan 2000

Critical Habitat Map 2010

GEOLOGICAL SURVEY OF ALABAMA SPECIAL MAP 247

The U.S. Fish and Wildlife Service has designated 26 river and stream segments (units) in the Mobile River Basin (69 FR 40084) as critical habitat for three threatened and eight endangered freshwater mussel species (table 1) under the Endangered Species Act of 1973, as amended The habitat units encompass approximately 1.093 miles (1,760 kilometers) of stream and river channels in four states. Although this is a small portion of each species' historic range, the habitat units include a significant part of the Mobile River Basin's remaining high-quality, free-flowing rivers and streams and reflect the variety of small stream to large river habitats once occupied by these species. The 26 habitat units were selected based on best available information about the essential habitat components required by these 11 species including; (1) geomorphically stable stream and river banks and channels; (2) a stream flow regime sufficient for normal behavior, growth, and survival of all life stages of mussels and their fish hosts; (3) acceptable water-quality conditions necessary for normal behavior, growth, and viability of all life stages; (4) sand, gravel, and (or) cobble substrates with low amounts of fine sediment and low amounts of attached filamentous algae; (5) the presence of fish hosts with adequate living, foraging, and spawning areas; and (6) few or no competitive or predaceous nonnative species. Detailed descriptions of critical habitat reaches given below (table 2) allow accurate location on larger scale maps. The colored polygons on the map to the left represent contributing watershed areas to the critical habitat unit reaches depicted in red.

Table 1. Threatened and endangered freshwater mussel species in the Mobile River Basin.

Table 2 Detailed descriptions of critical habitat units in the Mobile River Basin

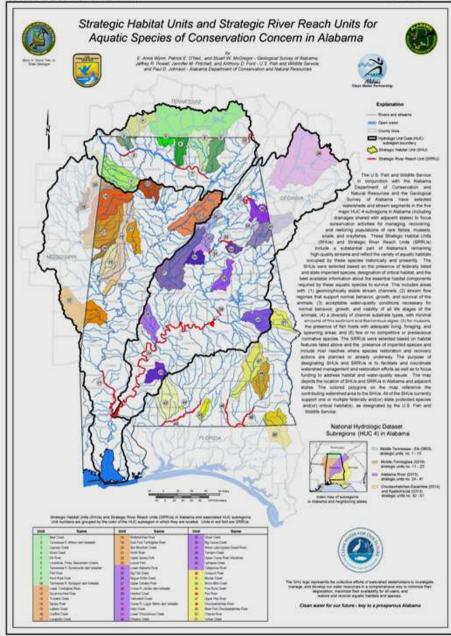

Critical Habitat Unit	Name	State/Counties	Reach
1	East Fork Tombigbee River	Miss. Monroe, Itawamba	East Fork of Tombigbee River main stem from Miss. Hwy. 278 upstream to the confluence of Mill Creek.
2	Bull Mountain Creek	Miss Itawamba	Bull Mountain Creek main stem from Miss. Hwy. 25 upstream to U.S. Hwy. 78
3	Buttahatchee River and Sipsey Creek	Miss Lowndes Monroe: Ala Lamar	Buttahatchee River main stem from its confluence with Columbus Lake upstream to confluence of Beaver Creek.
			Sipsey Creek from its confluence with Buttahatchee River upstream to the Miss /Ala state line.
4	Luxapalila Creek and Yellow Creek	Miss. Lowndes, Ala. Lamar	Luxapalila Creek main stem from Waterworks Road (Columbus) upstream to 0.6 mile above Steens Road. Yellow Creek main stem from its confluence with Luxapalila Creek upstream to confluence of Cut Bank Creek.
5	Coaffire Creek	Ala, Pickens	Coaffire Creek main stem from its confluence with Aliceville Lake upstream to U.S. Hwy 82
6	Lubbub Creek	Ala, Pickens	Lubbub Creek main stem from its confluence with Gainesville Lake upstream to confluence of Little Lubbub Creek
7	Signey River	Ala Greene Pickens Tuscaloosa	Sipsey River main stem from its confluence with Gainesville Lake upstream to Ala. Hwy. 171.
8	Trussels Creek	Ala. Greene	Trussels Creek main stem from its confluence with Demopolis Lake upstream to Ala. Hwy. 14
9	Sucarnoochee River	Ala, Sumter	Sucarnoochee River main stem from its confluence with the Tombiobee River upstream to the Miss /Ala. state line.
10	Sigsey Fork and tributaries	Ala, Winston, Lawrence	Signey Fork main stem from sec. 11/12 line (T. 10 S. R. 8 W.) upstream to confluence of Hubbard Creek
			Thorspan Creek from the confluence with Hobbard Creek upstream to see 2 line (1.8 s. R. 9 W.). Brushy Creek from the confluence of Bowle Seek upstream to see (1.8 s. R. 9 W.). Brushy Creek from the confluence of Bowle Creek upstream to Winston. Creek the Creek upstream to Seek (1.8 s. R. 9 W.). Brush Creek from the confluence with Brush Creek upstream to Winston. Assertment County Ine. Seek from the confluence with Brush Creek upstream to Winston. Assertment County Ine. Seek from the confluence with Brushy Creek upstream to Winston. Seek from the Creek from the Creek upstream to Winston. Seek from the Creek with Seek from the Confluence with Speek from Lugarian Creek. Seek from the Creek with Seek from the Confluence with Speek from Lugarian Creek. Seek from the Creek with Seek from the Confluence with Speek from Lugarian Creek. Seek from the Creek from the Confluence with Speek from Lugarian Creek.
11	North River and Clear Creek	Ala, Tuscaloosa, Fayette	North River main stem from Tuscaloosa County Road 38 upstream to confluence of Ellis Creek. Clear Creek from its confluence with North River to Bays Lake Dam in Favette County.
12	Locust Fork and Little Warrior River	Ala. Jefferson, Blount	Locust Fork main stem from U.S. Hwy. 78 upstream to confluence with Little Warrior River. Little Warrior River from its confluence with Locust Fork upstream to confluence of Calvert Prong and Blackburn Fork.
13	Cahaba River and Little Cahaba River	Ala, Jefferson, Shelby, Bibb	Cahaba River from U.S. Hwy. 82 upstream to Jefferson County Road 143. Little Cahaba River from its confluence with Cahaba River upstream to confluence of Mahan and Shoal Creeks.
14	Alabama River	Ala. Autauga, Lowndes, Dallas	Alabama River from its confluence with Cahaba River upstream to confluence of Big Swamp Creek.
15	Boque Chitto Creek	Ala, Dallas	Boque Chitto Creek main stem from its confluence with the Alabama River upstream to U.S. Hwy. 80
16	Tallapoosa River and Cane Creek	Ala. Cleburne; Ga. Paulding, Haralson	Tallapoosa River main stem from U.S. Hwy, 431 upstream to confluence of McClendon and Mud Creeks. Cane Creek from its confluence with the Tallapoosa River upstream to sec. 4 northern line (T. 15 S. R. 11 E.)
17	Uphapee, Choctafaula, and Chewacia Creeks	Ala. Macon, Lee	Lichagee Creek from A for July July 1994 upstream to confluence or profit from the Macon County Road 54. Chocatefula Creek from the confluence with Upstream to Confluence or the Macon County Road 54. Chewacia Creek from its confluence with Opintoco Creek upstream to Lee County Road 1996 Opintocoo Creek from its confluence with Chewacia Creek upstream to Lee County Road 1996 Opintocoo Creek from its confluence with Chewacia Creek upstream to Macon County Road 1996 Opintocoo Creek from the confluence with Chewacia Creek upstream to Macon County Road 1996 Opintocoo Creek from the Confluence with Chewacia Creek upstream to Macon County Road 1996 Opintocoo Creek from the Confluence with Chewacia Creek upstream to Macon County Road 1996 Opintocoo Creek from the Confluence with Chewacia Creek upstream to Macon County Road 1996 Opintocoo Creek from the Confluence with Chewacia Creek upstream to Lee County Road 1996 Opintocoo Creek from the Confluence with Chewacia Creek upstream to Lee County Road 1996 Opintocoo Creek from the Chewacia Creek upstream to Lee County Road 1996 Opintocoo Creek to Macon County Road 1996 Opint
18	Coosa River and Terrapin Creek	Ala. Cherokee, Calhoun, Cleburne	Coosa River main stem (old river channel) from power line crossing southeast of Maple Grove upstream to Weiss Dam. Terrapin Creek from its confluence with old Coosa River channel upstream to Cleburne County Road 49. South Fork Terrapin Creek from its confluence with Terrapin Creek upstream to Cleburne County Road 55.
19	Hatchet Creek	Ala Coosa Clay	Hatchet Creek main stern from confluence of Swamp Creek upstream to Clay County Road 4.
20	Shoal Creek	Ala. Calhoun. Cleburne	Shoal Creek main stem from Whitesides Mil Lake upstream to the tailwater of Coleman Lake Dam.
21	Kelly Creek and Shoal Creek	Ala. Shelby, St. Clair	Kelly Creek main stem from its confluence with Coosa River upstream to confluence of Shoal Creek. Shoal Creek main stem from its confluence with Kelly Creek upstream to St. Clear/Shelby County line.
22	Cheaha Creek	Ala, Clay, Talladega	Cheaha Creek main stem from its confluence with Choccolocco Creek upstream to tailwaters of Chinnabee Lake Dam.
23	Yellowleaf Creek and Muddy Prong	Ala Sheiby	Yellowleaf Creek main stem from Ala. Hwy. 25 upstream to Shelby County Road 49. Muddy Prong main stem from its confluence with Yellowleaf Creek upstream to U.S. Hwy. 250.
24	Big Canoe Creek	Ala St Clair	Big Canoe Creek main stem from its confluence with Little Canoe Creek upstream to confluence of Fall Branch.
25	Costanaula, Coosawattee, and	Ga. Floyd. Gordon, Whitfield, Murray	by Canide Creek main stem som as commence with Etowah River upstream to confluence of Conseques and Conseques River upstream to confluence of Conseques and Conseques River upstream to confluence of Conseques and Conseques
23	Conasauga Rivers and Floyd Creek	Tenn. Bradley, Polk	Consavative River from its confluence with the Consavage River upstream to Gis. Hely. 136. Consavage River main stem from its confluence with the Consavage River upstream to Gis. Hely. 136. Consavage River main stem from its confluence with the Consavage River upstream to Murray County Road 2. Helly Creek main stem from its confluence with the Consavage River upstream to confluence of Rock Creek.
26	Lower Coosa River	Ala. Elmore	Coosa River main stem from Ala. Hwy. 111 bridge upstream to Jordan Dam.

Critical Habitat Units become Strategic Habitat Units (SHUs)

- The SHU is a biological tool used to help prioritize and focus conservation activities and limited funding
- It serves as a biological layer for informing watershed restoration efforts
- The pilot project was in the North River SHU

Snails

Mobile River Basin Mollusk Recovery - January 201

Appendix II-B. List of snalls considered to be conservation priorities in the Mobile River Basir Tier assignments generally reflect the degree of immediate imperilment for each taxon. Taxon with bink TAX potential are denoted with an asterisk (**).

#	Taxon	G Rank	Federal Status
	Tier 1:		
1.	Antrorbis breweri. Manitou Cavesnail	G1	
2.	Clappia cahabensis, Cahaba Pebblesnail *	G1	_
3.	Elimia bellacrenata, Princess Elimia *	G1	
4.	Elimia cochilaris, Cockle Elimia *	Ğ1	
5.	Elimia crenatella, Lacy Elimia	G1	Threatened
6.	Elimia lachryma, Teardrop Elimia	G1	
7.	Elimia vanuxaminana, Cobble Elimia	G1	
8.	Leptoxis foremani, Interrupted Rocksnail	G1	Candidate
9.	Leptoxis plicata, Plicate Rocksnall	G1	Endangered
10.	Lepyrium showalteri, Flat Pebblesnail *	G1	Endangered
11.	Lioplax cyclostomaformis, Cylindrical Lioplax	G1	Endangered
12.	Marstonia sp., Cahaba Pyrg	G1	
13.	Pleurocera foremani, Rough Hornsnail *	G1	Candidate
14.	Pseudotryonia grahamae, Salt Spring Hydrobe	G1	
15.	Rhodacme elatior, Domed Ancylid	G1	
16.	Stiobia nana, Sculpin Snail	G1	
	N = 16		
	Tier 2:		
17.	Elimia melanoides, Black Mudalla	G2	
18.		G1	
19.	Elimia striatula, File Elimia *	G1	
20.	Leptoxis taeniata, Painted Rocksnail *	G1	Threatened
21.	Marstonia herschleri, Coosa Pyrg	G1	
	N = 5		
	Tier 3:		
22.	Elimia ampia, Ample Elimia	G2	
23.	Elimia annettae, Lilyshoals Elimia *	G2	
24.	Elimia hydei, Gladiator Elimia *	G2	
25.	Elimia showalteri, Compact Elimia *	G2	
26.	Elimia varians, Puzzle Elimia	G2	
27.	Elimia variata, Squat Elimia	G2	
28.	Leptoxis ampla, Round Rocksnail *	G2	Threatened
29.	Leptoxis picta, Spotted Rocksnail	G2	Candidate
30.	Tulotoma magnifica, Tulotoma *	G2	Endangered
	N=9	9

Tiers for mussels and snails

Mussels

Appendix II-A. List of mussels considered to be conservation priorities in the Mobile River Basin. The assignments generally reflect the degree of immediate imperilment for each taxon. Taxon with high R/A potential are denoted with an asteriek (*).

Ħ	Taxon	G Rank	Federal Status
	Tier 1:		
1.	Epioblasma penita, Southern Combshell	G1	Endangered
2.	Ligumia recta, Black Sandshell	G4	Lindangorod
3.	Margaritifera marrianae, Alabama Pearishell	Gi	Candidate
4.	Medionidus parvulus, Coosa Moccasinshell	G1	Endangered
5.	Pleuroberna athearni, Canoe Creek Pigtoe	Gi	Lindangoroa
6.	Pleurobema hanlevianum, Georgia Pigtoe	Gi	Candidate
7.	Pleurobema rubellum, Warrior Pigtoe	Gi	Endangered
8.	Pleurobema taitianum, Heavy Pigtoe	G1	Endangered
0.	N = 8	10.	Lindangorda
	N=0		
	Tier 2:		
9.	Elliptio arca, Alabama Spike	G2	
10.	Elliptio arctata, Delicate Spike	G2	
11.	Medionidus acutissimus, Alabama Moccasinshell *	G2	Threatened
12.	Obovaria jacksoniana, Southern Hickorynut	G2	
13.	Obovaria unicolor, Alabama Hickorynut	G1	
14.	Pleurobema georgianum, Southern Pigtoe	G1	Endangered
15.	Ptychobranchus foremanianus, Alabama Kidneyshell	G1	
16.	Ptychobranchus greenii, Triangular Kidneyshell *	G1	Endangered
17.	Strophitus connasaugaensis, Alabama Creekmussel *	G3	
18.	Toxolasma corvunculus, Southern Purple Lilliput *	G1	
	N = 10		
	Tier 3:		
19.	Ambiema elliottii, Coosa Fiveridge	G3	
20.	Anodontoides radiatus, Rayed Creekshell *	G3	
21.	Hamlota altilis, Finelined Pocketbook *	G2	Threatened
22.	Hamlota perovalis, Orangenacre Mucket *	G2	Threatened
23.	Lasmigona etowaensis, Southern Toesplitter *	G2	
24.	Pleurobema decisum, Southern Clubshell	G2	Endangered
25.	Pleurobema perovatum, Ovate Clubshell	G1	Endangered
26.	Potamilus Inflatus, Alabama Heelsplitter *	G1	Endangered
	N = 8	1 -	30.00

The following MRB federally listed mussels were not included in this prioritization because they are likely extinct.

Epioblasma metastriata, Upland Combshell, Epioblasma othcaloogensis, Southern Acornshe Pleurobema curtum, Black Clubshell, Pleurobema marshalii, Flat Pigtoe, Quadrula stapes, Stranshall.

Summary of 2012 Mollusk Reintroductions:

Tennessee Basin:

Alabama Lampmussel- E Paint Rock - lower Bear Creek ElkRiver, TN

Cumberland Bean - E Paint Rock

Cumberland Mocassinshell Bear Creek

Rabbitsfoot - C Limestone Creek

Painted Creekshell Limestone Creek

Oystermussel- E Paint Rock

Coosa Basin:

Alabama Rainbow Choccolocco Creek Fine-lined Pocketbook - T Little River

Alabama Creekmussel Choccolocco Creek

Interrupted Rocksnail - E Coosa River

Cahaba Basin:

Southern Combshell- E Cahaba River

Spotted Rocksnail Cahaba River

Coosa Mocassinshell- E Little Cahaba River

Warrior Basin:

Plicate Rocksnail - E Locust Fork

Alabama Basin:

Orangenacre Mucket-T Tallatchee Creek

GEORGIA

Johnson et al 2012

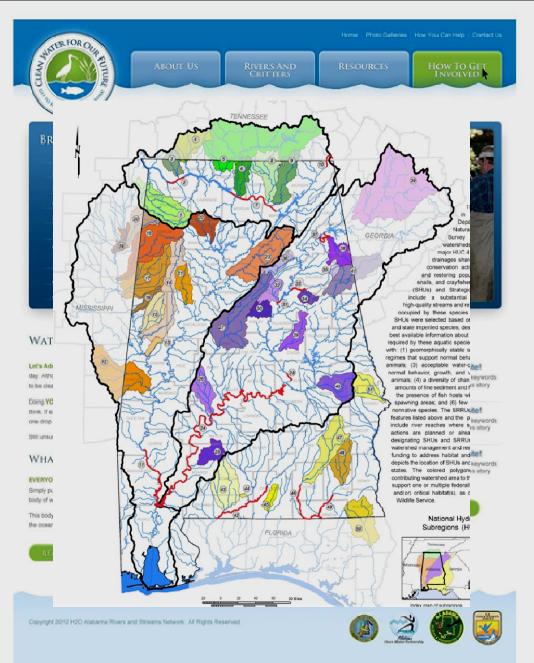

Assess Restore Recover Monitor

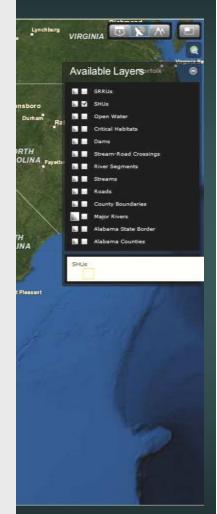

Performance measures for success

- Improved biological condition
- Improved water quality
- Improved status of imperiled fauna and flora
- Reduced pollutant loadings
- Restored habitat
- Restored natural water flow regimes

SHU concept is being used by our partners.

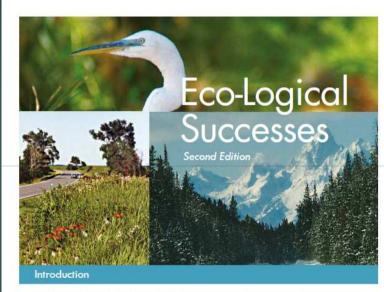

This map was used in a meeting with NRCS to assist them in distributing EQUIP funds.

We focused on four watersheds and used the 374 species list to identify opportunities for conservation activities

FHWA Publication Highlights SHC/LCC Approach to **SHU Project**

In 2006, leaders from eight Federal agencies signed the interagency document Eco-Logical: An Ecosystem Approach to Developing Infrastructure Projects. Eco-Logical is a document that outlines a shared vision of how to develop infrastructure projects in ways that are more sensitive to terrestrial and aquatic habitats, promoting advanced mitigation and early consideration of critical environmental resources.

The eight Eco-Logical signatory agencies are:

- Bureau of Land Management (BLM)
- Federal Highway Administration (FHWA)
- National Oceanic and Atmospheric Administration (NOAA) National Marine Fisheries Service
- National Park Service (NPS)
- U.S. Army Corps of Engineers (USACE)
- U.S. Department of Agriculture Forest Service (USFS)
- U.S. Environmental Protection Agency (EPA)
- U.S. Fish and Wildlife Service (USFWS)

Since signing the document, the eight agencies have continued to collaborate on efforts to promote the principles embodied in the Eco-Logical document. In January 2011, FHWA published the first Eco-Logical Successes document. The document featured at least one of each signatory agency's strategic environmental programs, projects, and efforts that are either directly related to or share the vision set forth in Eco-Logical and identified potential joint projects and opportunities for collaboration among the agencies. This, the second edition of Eco-Logical Successes, focuses on two agency programs; BLM's Landscape Approach and USFWS's Strategic Habitat Conservation Framework and Landscape Conservation Cooperatives, and provides a more in-depth discussion of these two programs and their linkages to Eco-Logical.

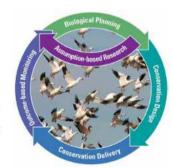

Eco-Logical Successes: Second Edition

U.S. Fish and Wildlife Service Strategic Habitat Conservation Framework and Landscape Conservation Cooperatives

Strategic Habitat Conservation Framework USFWS uses the Strategic Habitat Conservation (SHC) framework to encourage conservation and habitat management decisions based on landscape-scale resource threats. The goal of SHC is to improve the efficiency and transparency of natural resource management agencies by using a collaborative, adaptive process that strategically targets priority species. The SHC framework is a way of approaching conservation delivery where each conservation action contributes to strategic goals and objectives determined through data-driven modeling of existing conditions, resources, and opportunities. Conservation activities are monitored for their effectiveness and research is conducted into the relationships that form the basis for planning and delivery decisions. The results of monitoring and research are used to inform future conservation planning and delivery.

SHC is an iterative process with five consecutive elements that feed into each other, leading to continually improving results. The five elements are:

- Biological Planning: Identify priority resources, determine associated population objectives, and model relationships between habitat and populations.
- · Conservation Design: Identify priority areas for conservation and determine population-based
- · Conservation Delivery: Implement conservation actions through partnerships and programs.
- Outcome-Based Monitoring: Evaluate the success of conservation delivery activities to inform future Biological Planning, Conservation Design. and Conservation Delivery.
- Assumption-Based Research: Test standard assumptions used in Biological Planning to improve future activities.

USFWS Strategic Habitat Conservation Framework, Source: USFWS

Landscape Conservation Cooperatives

Building on the SHC concept, USFWS is developing a national network of public-private partnerships called Landscape Conservation Cooperatives (LCCs). There are 21 LCCs; each one covers a large area that roughly corresponds with an aggregation of existing Bird Conservation Districts. The LCCs cover all 50 United States and extend across international borders into neighboring areas of Canada, Mexico, and several Pacific Island Territories. Each LCC will provide scientific and technical support while facilitating partnerships that enable resource agencies and stakeholders to deliver more efficient landscape-scale conservation through collaboration. The role of the LCCs is to identify best practices, connect the efforts of conservation agencies, identify gaps in conservation delivery, avoid duplication through improved conservation planning and design, and to disseminate high-quality information.
